Postdoctoral Associate
Division of Comparative Effectiveness and Outcomes Research
Department of Healthcare Policy and Research
Weill Medical College, Cornell University (New York, NY)

The Division of Comparative Effectiveness and Outcomes Research is seeking a Postdoctoral Associate with an interest in conducting collaborative research on screening and linkage to medical and substance abuse care for former and active substance users, with a focus on hepatitis C and cost of service delivery. The Postdoctoral Associate will participate in multi-site research and evaluation projects currently funded by the National Institute on Drug Abuse and the Centers for Medicare and Medicaid Services under the supervision of Bruce R. Schackman, PhD, Professor of Healthcare Policy and Research at Weill Cornell Medical College, and will have the opportunity to be responsible for independent areas of research within these projects. The successful applicant will have experience conducting both quantitative and qualitative research in a related area, and have excellent organizational and communication skills including strong writing skills. Familiarity with health economics and with substance abuse, HIV, and/or HCV clinical settings is highly desired. Applicants must currently hold a doctoral degree in a relevant area of study or will receive such a degree by July 1, 2015. The position requires a commitment for a minimum of two years, subject to a successful performance evaluation after the first year. Applicants must be willing to travel to research sites located in New York City and elsewhere in the United States.

To apply, please email (1) a brief cover letter describing current research and relevance to this position (2) a recent C.V. and (3) the names of three references to Dr. Schackman c/o Dr. Paul Teixeira, Research Project Manager (pat2007@med.cornell.edu).

Weill Cornell Medical College is an employer and educator recognized for valuing AA/EEO, Protected Veterans, and Individuals with Disabilities.
