Become a CAPSTONE PROJECT PARTNER

Project types* include:

- **Research**: Students will conduct extensive research to provide a technical report or white paper
- **Analytics**: Students will analyze information to offer a detailed strategy
- **Technical**: Students will develop usable tools

Capstone projects in our **Master of Science** degree program span three terms over 11 months. Our students, many of whom enter the program with clinical expertise, acquire core competencies in a robust set of skills:

- Comparative Effectiveness Analysis
- Computer Programming
- Cost Effectiveness Research
- Econometrics (cost & comparative effectiveness)
- Data Visualization
- National Health Policy
- Machine Learning
- Policy Analysis (cost & comparative effectiveness)
- Program Evaluation
- Statistical Analysis
- Stata, R & SAS
- Survey Design

Projects can be domain-specific or interdisciplinary in scope. Students will be supervised by a dedicated team of faculty and staff at Weill Cornell to ensure project outcomes, deliverables, and enhance the learning experience.

**Contact**
If you are interested in collaborating with us in a Capstone Project for the upcoming year, contact Brian Carroll, Associate Director of Education, at bgc2002@med.cornell.edu or 646-962-8049.
